

TDWG Technical Architecture Group (TAG)

Online Meeting — 2024-05-16

Logistics

Meeting Date and Time: 2024-05-16

Zoom Link: <https://us02web.zoom.us/j/88412244666>

TAG GitHub Repo: <https://github.com/tdwg/tag>

Attendees

- David Fichtmueller
- Raïssa Meyer
- Kit Lewers
- Steve Baskauf
- David Bloom
- Ben Norton
- Greg Whitbread
- James Macklin

Agenda

- MIDS Update
- StaDocGen
 - Contributors
 - Launch
- Review Standards Pages
- Improve Presentation and Delivery of Standards

Notes

- MIDS is close to submitting an initial draft for review. The standard is structured differently than most standards. A preliminary review by the TAG is especially important given the departure from the norm. Please see the MIDS repository for more information or contact the conveners.
- StaDocGen has passed another series of tests and is almost ready to send.
- Need to review documentation pages for templating using StaDocGen.
- Solicitation for possible presentation improvements to lower the bar of entry.
- Next meeting is in July.

Notes on Use of Field Names Across Vocabularies

(Assembled by Steve post-meeting)

1. See https://github.com/tdwg/tag/blob/master/documents/metadata_field_names.csv for a tabular comparison.
2. The fields required or recommended by the SDS are usually named consistently. A few cases in AC use older names since it was the first List of Terms constructed — GitHub issues will be created for these.

- 3. Most non-required fields are named consistently, though in many cases they are not used by every vocabulary.
- 4. Some fields required or recommended by the SDS are not present in the LtC List of Terms — GitHub issues will be made.
- 5. Two actual inconsistencies to consider: (1) The SDS recommends the Executive Decision link be called "Decision", but existing documents use "Executive Committee decision". (2) The property linking to an external model (sawsdIrd:modelReference) is named inconsistently among controlled vocabularies.
