Meeting Recording: https://drive.google.com/file/d/141BmTw6WnL2dZADdpdA3vHnxk_grd38C/view?usp=sharing

TAG West Meeting

Meeting Time: 00:00 UTC

Zoom Link: <https://us02web.zoom.us/j/84118582636>

TAG GitHub Repo: <https://github.com/tdwg/tag>

Attendees

East Meeting:

- Ben Norton
- Nicholas Car
- Gary Motz
- John Kunze
- Cecilie Svenningsen
- Katherine Webbing
- Sam Liefelang
- Wouter Addink
- Holly Little
- Erica Krimmel
- David Fichtmueller

West Meeting:

- Ben Norton
- Nicholas Car
- Stan Blum
- Greg Whitbread

Agenda

1. Status Updates

- MIDS — Updated Documentation: <https://tdwg.github.io/mids/>
- Mineralogy Extension — Implementation Report
- Darwin Core DP Public Review — Landing Page: <https://gbif.github.io/dwc-dp/#darwin-core-conceptual-model>
- Taxon Concept Schema — Public Review begins soon

2. Vocabularies

- Presentation by Nick Car, chair of the Linked Data Working Group

East Meeting Summary

(Generated by Zoom AI Companion)

The meeting focused on a collaboration between TDWG and the Australian government to develop a vocabulary management system for biodiversity standards. Nicholas Car from New Zealand presented technical expertise on semantic web technologies and vocabulary publishing infrastructure. The group discussed technical implementation, governance processes, and approval workflows needed for managing vocabularies like Darwin Core DP, emphasizing the importance of having designated stewards for vocabulary maintenance.

Next Steps

- Ben: Email the group asking for feedback and approval on the vocabulary publishing collaboration with the Australian government.
- Ben: Draft a process for vocabulary approval and management for TDWG.
- Ben: Work on implementing the mineralogy extension vocabularies as the first example on the Australian vocabulary service.
- Nick: Provide technical support for the implementation of the vocabulary publishing system.
- TDWG: Identify maintainers/stewards for each vocabulary that will be published.
- Ben: Finalize the letter of collaboration that states the conditions of the partnership.

Topics Covered

Standards and Initiatives Updates:

- MIDS expert review group formation and timeline
- GeoAPIs mineralogy extension progress
- Darwin Core DP public review status
- Taxon concept schema preparation

Vocabulary Management Systems:

- Infrastructure needs for Darwin Core DP vocabulary publishing
- Australian Biodiversity Information Standard overview
- Vocabulary governance and version control processes
- Technical implementation using knowledge graphs and the Prez tool

Technical Implementation:

- Vocabulary publication workflows and data models
- Content negotiation and multilingual support capabilities
- Persistent identifiers for vocabularies and terms
- System integration with existing standards (ISO, OGC)

Collaboration Planning:

- Partnership proposal with Australian government for vocabulary services
- Vocabulary approval processes and stewardship models
- Test case implementation using mineralogy extension vocabularies
